The National Dental Health Checkup

April is National Dental Health Month And to mark it the Canadian Dental Association has prepared this, course, rather it's an 'awareness

This is not an idle promise. There have been remarkable advances in we have the ability to variually checkup presented in the form of a short quie -20 ledividuals have to play an informed and active

questions - designed to help you test your dental rele in their own dental care. health knowledge. Why a test of dental health knowledge? Become your knowledge of the firedomentals of good dental health can be the key to keeping your with strong and healthy for His When it comes to

depend health what you don't know one hart you. As president of the Canadian Dental Associafion. I speak for some 10,000 members working in communities right across the country. And what we see, over and over again, is that lack of knowledge carriers too many people of all ages to suffer needlessly from poor dontal health. Dental disease is a serious health problem in Canada awareness of important dental health issues

Dear Beader:

In order to close the awareness gap, our association is launching a dental awareness tion campaign. Our theme, Good for Life, copresses both the value of dental health to overall well-bring and the fart that with proper care teeth and gums can be kept healthy for a lifetime

Of all chrome health problems, dental disease is the most preventable. We are concerned about the problem of dental disease, committed to the volution, and organistic about the opportunities for achieving it. A powerful first step is a simple change in the attitude, knowledge and behaviour of Canadians How's your own dental health knowledge? You can find cut by taking the National Dental Health Checkup that follows. It won't take very long, but it will be time well spent. I bone you'll

may be surprised by some of what you learn.

How to take the Checkup

The National Dental Health Chycleun is: district into four sections -- Artitudes, Dental The correct answers and points are given on each section to record your score as you go along.

The main rurpose of the test is not simply to score points, however, but to help you identify missing and to help lead you to better personal If you would like other members of your family or friends to take the Checkup, use a

Attitudes

Before proceeding with this question, tide a few moments to make a mental list of those factors that you consider to be important to your overall health. New the execution Did you we hade dental health in

As you grow older, do you expect:

c) to know your tools strong and healthy for life. Do you associate visits to the deatist with nain and discordar?

Dental Disease health problem in Carada today

b) no Dental disease is the third most common chronic

to have what effect on the incidence of

10. What is Brookle? c) a drug NAME OF PERSONS ASSESSED.

After the age of 25, people become less susceptible

The most common cause of tooth loss in adults is: d) agre

Which of the following can indicate the early predyable h a) tender or evolven surre

c) formation of spaces between terms som or bleeding gams

Stress can be a contribution factor in a number of dental brakh problems. Self Care

Which of these is worse for your teeth? (Choose one from each group.)

c) no difference. II a) a bid nece of me for descert after a meal

b) fixer smaller pieces at cieven o'clock, four o'clock and builting c) no difference When cleaning your teeth, you should pay particular

attention to the chewing surfaces

If your game bleed during cleaning, you should

avoid touching them with your brush or floss. b) false

Professional Care How often should you see a dentist? a) once a year c) so soon as you suspect a problem

b) every 6 months di depends on your individual needs Regular dental visits are most important for people who are: d) over 25 years old

The primary purpose of a professional cleanage is to make your teeth whater and brighter

it is generally worthwhile to save an infected tooth. c) false b) true for adult teeth

Your destist can treat teeth to make them less susceptible to decay.

There are new acrylic materials that can be used to renar chapped, stamed and unevenly spaced teeth. b) felor

After the recuth is fully formed, orthodoxic work is no longer effective.

Answers

Do you consider dental health to be an important factor in your overall health?

From the medical point of view, there is no quantion that derial health is no important health insure. A healthy body is free of infection, disease, pain, disconjian and playsacal the point of the point of the point of the point of the body, used ordinary derial previous are asset by infection. They can be commanly justified (Last year in North America as distrained 100 million bound or sook were first a credit of them; paint of discontine, I and when density are recorded to the point of the point of the contract of the credit of them; and or discontine, I and when density only recordary importance to their dental health. This attitude is even inthe surprising when you consider that dental health focusins on a part of the body that plays a final smeath level in our liver—in craftition, in communication, and in perspect appointment. Sure that the best is visit to your overall well-being to the attitude you bring towards the manufacture of your dental set.

2 Do you expect to keep your teeth strong and healthy for life?
